

Leica JetStream 1.0

Centralized project storage and ultra-high-speed rendering

New simplified project access provides an easy, singular entry point

Experienced CloudWorx users see the familiar coordinate system and units setup box

Even billions of points load instantly with literally no waiting

JetStream loads all-the-points, all-the-time, for a constant photo-realistic look

Centralized point cloud project storage and access with ultra-high-speed rendering.

Leica JetStream provides state-of-the-art point cloud project performance and big data management for Leica CloudWorx users. JetStream overcomes the biggest challenges in productivity, ease-of-use and scalability of ever increasingly large laser scan point cloud data inside of CAD systems.

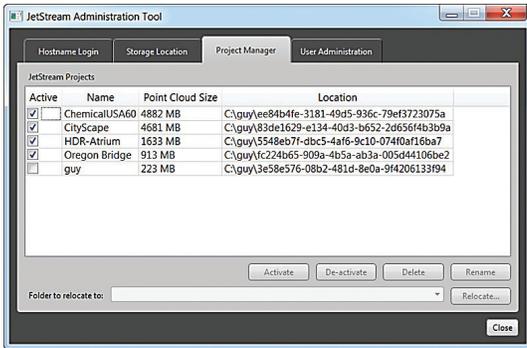

JetStream's technology innovations deliver a completely new experience for point clouds in CAD. The instant open, all-the-points, all-the-time, paradigm is a revolutionary leap forward in performance. It drives better comprehension, increased productivity and removes the frustration and

confusion of previously available solutions. JetStream's streamlined project management completely insulates the CAD user from needing laser scanning expert knowledge. JetStream's centralized project storage simplifies and streamlines a team-work approach for unlimited sized workgroups.

Features and Benefits

- File sizes 5x to 10x smaller than traditional storage
- Instant loading and rendering of any sized project
- Pan and Zoom show, all-the-points, all-the-time
- Optimized bandwidth ensure fast network access
- "Ease-of-use" design simplifies using point clouds
- Centralized data storage and access removes duplication of data, simplifies back-ups and management, saves time and money

Leica JetStream 1.0

The JetStream ProjectVault is a very easy to manage data repository. Here you can see the JetStream Admin application showing a list of projects that are currently stored in the vault.

Ultra-high-speed rendering, an entirely new experience for CloudWorx users

For starters, users will simply be amazed with the new ultra-high-speed rendering experience inside their favourite CloudWorx/CAD platform. Starting with loading and fully rendering and point cloud instantly, regardless of the size of the dataset, even billions of points load in an instant.

During every zoom or pan or clip action, the user experiences the reality of having all-the-points, all-the-time. This not only removes the frustration often experienced with waiting while the screen slowly fills with points, it greatly improves the comprehension of the scene and massively improves the user productivity.

Big data management that delivers on every front

The JetStream ProjectVault is designed from the ground up for user productivity. First having a centralized data storage location delivers obvious benefits in data management supporting access to a wide range of simultaneous client users with no need of wasteful, expensive and error prone data duplication.

Secondly, the greatly simplified project data structure improves and simplifies project access for every user every day with a new, single entry point for every project it reduces and searching or learning curve, user can just dive right in.

The new data compression capabilities of JetStream ProjectVault minimize the required storage space by a factor of 10x in some cases, lowering cost and reducing network traffic and bandwidth requirements significantly.

Finally, the centralized data storage approach also provides a long list of additional benefits such as data security, where user access can be easily controlled and the benefits to the IT organization with simplified data back-up and management.

Leica JetStream Specifications		Hardware and System Requirements
JetStream admin	Administer users, server and storage locations for the JetStream vault.	Minimum specifications Processor: 2 GHz Dual Core processor or better RAM: 8 GB Hard disk: 40 GB Display: SVGA or OpenGL accelerated graphics card (with latest drivers) Supported operating systems: Windows 7 (64bit), or Windows 8 & 8.1 (64bit), Windows Server 2008R2 (64bit), Windows Server 2012 (64bit) / 2012R2 (64bit) File system: NTFS
JetStream ProjectVault	Storage location for JetStream projects (Point cloud data) and provides instant load and display of unlimited size point clouds to JetStream clients (i.e. CloudWorx)	
JetStream connector	Provides a connection to the JetStream ProjectVault from JetStream Clients (CloudWorx and Cyclone Clients)	
CloudWorx client	A client that receives JetStream point cloud data. WorkSpace support for management and storage of user created clips and point cloud color	
JetStream generator	Installed and run within Cyclone for export of point cloud projects to the JetStreamVault. Exports selected registrations. Exports selected ModelSpace data sets.	
		Recommended Specifications Processor: 3.0 GHz Quad Core w/ Hyper-threading or higher RAM: 32-64 GB's or more Hard disk: 500 GB SSD Drive Large project disk option: RAID 5, 6, or 10 w/ SATA or SAS drives Display: Nvidia GeForce 680, Quadro K3100 or ATI 7850 or better, with 2 GB's memory or more Operating system: Windows 7 (64bit), or Windows 8 & 8.1 (64bit), Windows Server 2008R2 (64bit), Windows Server 2012 (64bit) / 2012R2 (64bit) Network card: 1 GB network card or better File system: NTFS Please note: Optimal system specifications will depend on the number of users connected to the JetStream ProjectVault at the same time
